More about this rating

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may vary over time.
- The lowest category does not mean 'risk free'.

Why is this fund in Category 6?

The fund invests in equities and may therefore be subject to high volatility. This requires an elevated risk tolerance and capacity. The value of a unit may fall below the purchase price.

Further material risks:

- **Active management** This fund pursues a very active management style. Its performance may therefore deviate considerably from that of a comparable market return.
- **EM bonds investments** Emerging market bonds are usually subject to a high credit risk (i.e. potential loss due to failure of issuer).
- **Emerging markets** Pronounced fluctuations in price are characteristic of emerging and frontier economies. Other characteristics include specific risks such as lower market transparency, regulatory hurdles, illiquidity of markets as well as political and social challenges.
- **Investment in China** Investments via Shanghai or Shenzhen Stock Connect are subject to additional risks, in particular quota limitations, custody risk, clearing/settlement risk and counterparty risk.
- **Liquidity risk** Focusing intentionally on stocks in small and medium cap companies may entail additional risks (e.g. lower liquidity).

Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus.
